

The 3-in-1 TRAVEL KIT

The 3-in-1 Structured Water Travel Kit is a nifty choice for travelers and those wishing to drink their water and bathe in it too! Enjoy the combined functions of the portable, shower, and garden units and have structured water with you wherever and whenever you travel.

The Kit comes with a Natural Action Water Shower Unit (your choice of Regular or Dynamically Enhanced), a funnel for portable use, a shower head and a pair of pliers for shower use, and 2 garden attachments to allow for attaching to faucet and hose. All are enclosed in a lightweight traveling kit.

3-in-1 Travel Kit

Directions

For uses and installation instructions for the Portable, Shower, and Garden Units see the photos below for appropriate use.

Portable

Shower

Garden

Portable use is simply attained by attaching the funnel into the top of the screw threads and pouring any liquid into the funnel. Enjoy clean and energized water and drinks on the other side instantly. We recommend you screw the top thread onto the unit for a little more lift of the funnel.

Shower use is accomplished simply by taking the pliers and unscrewing your shower head. Then, carefully thread the structured water unit onto the 1/2" shower arm. Now, replace the shower head onto the nipple of the unit. Tighten gently to prevent leaks. Enjoy an energetic shower. For bath, simply leave the shower head off and let the unit fill the tub with structured water. This is an amazing, health-giving bath. To undo, simply reverse this procedure and place the unit, pliers, and shower head back in kit.

If shower head is too low, it may be necessary to buy an extension shower arm (shower riser) or adjustable shower adapter.

Garden use can bring out the best in your lawn, garden, and trees. Simply affix the plumbing attachments in kit to the unit, one on each end, as shown in photo below. Apply only enough tightening as to accomplish lack of leakage. Then attach one end of unit to faucet, and the other end of unit to garden hose. Enjoy watering your garden and pets with clean water!

Suggestions for Use

*Be sure to wash the unit as soon as possible when structuring liquids other than water. This can be accomplished with a couple tablespoons of apple cider vinegar in a quart of water if the unit gets sticky. But just the water pressure from a shower or garden faucet will clean the inside of the unit quite well.

*Avoid applying high temperature liquids for lengthy periods of time.

*Refrain from dropping the structuring unit.

IMPORTANT

All the illustrations on this instruction sheet show typical plumbing methods. Actual installations must be adapted to individual requirements and regional codes. The author has made every effort to insure accuracy and reliability of the information and instructions. However, neither the author nor the manufacturer will accept responsibility for misinterpretation of the directions or human error. The end user assumes complete and total responsibility for installation errors.

Congratulations!

You have just installed a Natural Action Technologies Structured Water Unit.

Thanks for helping maintain a green earth environment.
